Subject: RE: EPA contact info

Hello Non-Responsive

I am continuing to follow up on your concerns regarding MarkWest's Humphreys compressor station. EPA has been in contact with MarkWest regarding your concerns and those from other residents also living near the facility. May we share your name and contact information with MarkWest representatives? The purpose of sharing this information is to identify the exact locations of concerned residents in relation to the facility. MarkWest may also contact you to discuss your concerns directly and in more detail.

Also, can you provide me with any updates on your observations regarding the Humphreys Compressor Station and air quality?

Thanks,

Natalie

Subject: EPA contact info

Dear Non-Responsive

Thank you for taking the time to talk with me this afternoon about the MarkWest Humphreys Compressor Station. My contact information is below.

As I mentioned, it would be helpful if you or any nearby residents could keep an odor log. It can be as simple as recording the following pieces of information when you notice an odor or experience any adverse health effects:

- time
- date
- your location
- a description of the odor, if possible (e.g. sulfur/rotten eggs, oily, skunky, sweet, burnt, etc)
- any specific health effects experienced

- any adjustments made to activity because of the odor (e.g. had to close windows, guests left early, decided to eat dinner indoors instead of on porch, etc.)

Again, documentation of any observations related to this specific facility is most helpful. If you have contact information for nearby residents who would be able to share their specific observations, please pass that along to me or provide my contact information to them.

I am also interested in the Yale University air pollution study that you mentioned was underway in your area. If you could provide me with a contact name or coordinator of the study, I would appreciate it.

Thanks,

Natalie
